Steroids are powerful drugs that works by increasing protein synthesis within the cells. This may result in increased muscle and body mass by acting like the bodys natural male hormone called testosterone. Some forms or types of steroids are banned substances yet these still get into the hands of people who are not supposed to take them. Reports say that one can actually purchase steroids over the Internet. Steroid users are rampant nowadays that people may sometimes not readily recognize them and those that are hooked on the drug. For a few years, some antidepressant drugs have been cited as having the side effect of causing acne. In this regard, zoloft is often cited as the primary culprit. There is no concrete medical evidence of such, but there has been more than adequate evidence to prompt various organizations to conduct

research. There is also enough evidence to convince some to avoid taking zoloft and other chemically similar antidepressant [buy azathioprine in Australia](#) to avoid developing acne.

Running also helps prevent muscle and bone loss that naturally accompanies old age. The pressure that is created on the knees and legs during running actually help strengthen bones, muscles and ligaments - provided that one runs in a proper manner.
