Some symptoms include difficulty falling asleep, difficulty staying asleep, difficulty with early morning awakening, or not feeling rested by a good nights sleep. Occasionally, insomnia lasts for a short time and can be easily managed. Other times it is a chronic condition, lasting more than six months. This chronic insomnia is more troublesome and can affect work, social relationships, and health. Many people with insomnia are also diagnosed with other conditions such as depression, anxiety, allergies, or pain. The skin is subject to the harsh rays of the sun. Depending on your job, the skin can come in contact with harsh cleaning chemicals, dirt, grime, and grease. Even when one is relaxing and having fun, like in a swimming pool, our body can come in contact with chlorine and other harsh chemicals.
